- **To be enrolled in Practicum and Internship courses, a clinical site must be secured by the end of the second week of the term. If students have not secured a clinical site by this time, they are unlikely to be successful in completing the course requirements. To avoid financial penalty, and receive the 100% tuition refund, students must withdraw from the Internship or co-requisite Practicum and Seminar courses by the drop date for that specific term. Otherwise, students could be subject to administrative withdrawal and/or subject to failure of the courses for inability to meet course requirements.**
- **Acceptable preceptors and clinical sites cannot be perceived to have a conflict of interest as relates to evaluation of the student. For example, acceptable preceptors cannot be related to the student, and may not work in the same department as the student. It is at the discretion of the program coordinator which clinical sites and preceptors are appropriate for clinical courses.**
