Nurse Anesthesia Shadowing Documentation

Shadowing a Certified Registered Nurse Anesthetist (CRNA) is recommended before applying to UC's Nurse Anesthesia program. Print this form and complete it during your shadowing experience. Attach a brief statement that describes what you observed and your impressions. Bring the completed form to your interview.

Applicants may shadow a CRNA practicing at any location. Applicants are encouraged to complete the shadowing experience at a facility where they are employed. A limited number of shadowing experiences are also available at UC Medical Center for those who have difficulty making other arrangements.

Experiences:

Check all experiences that apply. (All are not required. Shadowing experiences vary.)

- Observed preoperative interview and preparation of patient
- Observed induction of general anesthesia
- Observed emergence from general anesthesia
- Observed PACU report
- Observed invasive line placement
- Observed regional techniques
- Discussed a typical day for a CRNA in the practice setting observed
- Discussed the roles and responsibilities of the CRNA shadowed
- Other unique experience: _____

Participant Name: _____ Date: _____

Facility Name: _____ Practice Name: _____

CRNA Name: _____ CRNA Signature: _____
